Abstract

With a length of over 60 years (first issue appeared in 1950), the magazine „Mitropolia Olteniei” had an important contribution to the study of history and philosophy of religions. In this review have been approached numerous issues of dogmatic theology, moral, religious and history and philosophy of religions. This study approached topics ranging from religions of Dacians and neighboring peoples to the important topics as inter-religious dialogue for modern society. If publications are spread over period of 60 years, one can deduce easily that in a relatively short period, this article will return among these studies with names and their articles who will continue to bring their contribution to the history and philosophy of religion.
