### **Abstract**

In this academic and theological article, we analyse in a profound manner the eschatological perspective of time. For the Orthodox theology, the eschatological teaching is very important because focuses the entire life of the Church around it. The mystical dimension of time comes to life when we see ourselves in a period of continual repentance and in knowledge of the Triune God. And for us, the resurrection of Christ, our Saviour, is more than a miracle, it gives the sense of the entire human existence. Through the reading of the Holy Fathers and our theological reflection, we present the Christian perspective and perception of the time in which we live. In other words, in this world we are only pilgrims, already and not yet in the Kingdom of God, through the Church of Christ.
