### **Abstract**

Pneumatological liturgical worship theology development is to reveal that the Church belongs not only to history of Salvation. The divine services cannot be reduced only to anamnesis or commemorative purposes. This is because the Holy Spirit dwelt personally, so It makes the whole Church personal divine economy for our Salvation to be permanent today. In other words, the liturgical life of the Church is the Salvation through Holy Spirit, permanently present in our life, being possible because of Holy Spirit's work. Therefore, Church services are His source of grace and power. In these, the believers become new ontologically in Christ through the Holy Spirit. He prepares them from this life to the future for the sons Father's condition.
