Abstract

The cult of the Virgin Mary was built on the theophanic aspects of her life. The Axion hymn is a liturgical poem inspired by the spirituality of the Church and is the expression of the popular devotion to the Mother of the Lord. The present study will try to reflect the image of the Virgin Mary in the Axion hymn. The central theological theme of the hymn is the sanctity of her life and the role of intercession of the Virgin Mary for the salvation of the humanity.
