### **Abstract**

Every Orthodox missionary must know and understand the role of role models of the Holy Apostles in the work of preaching the Holy Gospel. The mission is above all a testimony, and the testimony is that which uproots the cultural paradigms of the world in order to plant in their place the saving work of Christ. We propose, therefore, that this study represent a first part and, at the same time, an introduction in the field of missionary ideas from which to start a brief missionary research in the field of Orthodox theology.
